

## Man Down X

A lightweight yet strong and robust device complete with tilt activation. For lone or remote workers in an industrial setting or roles that involve manual labour that need a strong and robust device.

**From £160 per device**

## About the device

The Man Down X is a robust and hard wearing safety device that can raise alerts at the touch of a button and with its powerful man down and tilt activation function. The device also comes with an audio and vibrating alarm to prompt check-ins before an SOS alert is raised.

---
