Lifetime guidelines	
Storage time (when helmet not used)	3 years from shell injection date (helmet packed in proper condition, not exposed to light, chemica or any type of pollution). Store in a proper storage bag and/or in a closed cabinet to avoid extended exposure to sunlight, cold, humidity, exhaust fumes, etc. If the helmet has been stored more than 2 years, deduct the extra storage time from the recommended helmet's service life. NB: For EN 50365 class 0 helmets recommended storage temperature 20 ±15 °C to ensure performance
Service life (in addition to the storage time)	5 years from actual starting date of use. MSA recommends writing the date of first use onto a sticke (supplied with each helmet) and then sticking into the shell. This is normally the point at which service life starts
Suspensions (Push-Key and Fas-Trac III)	Replace when damaged or contaminated , or as required for hygienic reasons
