

## Anchor strop, 7mm steel, 50cm

**A050**

### Steel wire sling with swaged eyes including stainless thimble.

Used to provide a durable temporary anchor for rescue systems and access equipment where no fixed anchor points are available.

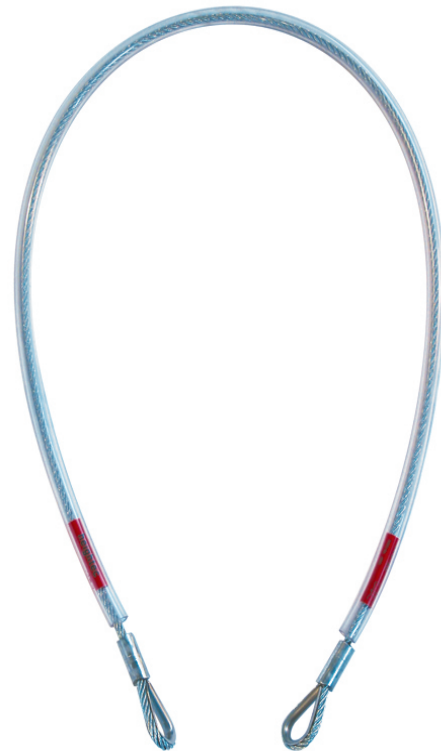

7 x 19 steel wire. PVC tube. ID labels. Large stainless steel thimbles.

A strong and flexible wire that is hard wearing. Clear tube which protects the wire and structure and allows for visual inspection. Helps minimise slippage on some surfaces.

Label located away from dirt and abrasion allowing for longer useable life span.

The large thimbles allows rotation of connectors for easier rigging.

Also available in 1m, 1.5m, 2m

### Specifications:

*NB: specifications and colour may change without notice.*
