Principles for certificate usage

- 1. The certificate is valid for products of the same type as the certified product.
- 2. The certificate holder is obliged to fulfil all conditions, under which the certificate was issued.
- 3. The certificate holder shall without delay inform the Certification Body about any changes of the certified product concerning its overall design and construction, and its documentation.
- 4. The Certification Body will withdraw the certificate from the holder who will be proven:
 - a) not keeping a list of complaints and not solving the complaints lodged against the product,
 - b) to consciously present false statements in the application form and basic documents essential for issuing of the certificate,
 - breach of commitment to enable the Certification Body to perform inspections, if being a part of the certification scheme.
- 5. The certificate holder is bound, in case of discontinuing or withdrawal of the certificate by the Certification Body, to return to the Certification Body all the certification documents required by the Certification Body (i.e. certificate) and to discontinue using any promotion material including any reference to certification.

The certificate holder is aware of these principles and is obligated to their fulfilment.
