

## Phoenix rescue harness

H11

**Designed for fire and industrial rescue teams working in confined space, vertical rescue and fall arrest. Suitable for use with back-mounted breathing apparatus.**

Key features include:

- Quick and easy to fit
- Highly durable and comfortable to wear
- Integral back panel
- Semi-circular screwlink front attachment point
- High rear attachment point
- Protective leg loop sleeves
- Adjustable locking side buckles
- Captive buckles with large tabs
- Low profile accessory loop at shoulder

Integral back panel helps to maintain the structure of the harness.

Semi-circular screwlink permits safe multi-directional loading for casualty attachment.

Front attachment point is rated for fall arrest, it can be used for lowering or raising and suspension.

Rear attachment point is rated for fall arrest and suspension, it is positioned high to be compatible with breathing apparatus and is reachable by the user.

Additional wear protection on the leg loops.

Adjustable side buckles allow for added comfort and sizing, but lock to prevent accidental release.

Buckles are captive to prevent disassembly and with large tabs for easy adjustment even wearing gloves.

Accessory loop allows attachment of torch, radio etc
