HWS Fall Arrest Device

This device has been manufactured, tested and certified in Germany to conform to the European Standard DIN EN 360, as a Retractable Type Fall Arrest Device.

The IKAR HWS Devices have been specifically developed to offer fall protection in an easy to use unit.

Working similar to a car safety belt, during normal use the user can move freely whilst the galvanised steel cable life-line is kept under permanent tension. In the event of a fall the locking system will activate and the internal brake disk will absorb energy to well below the 6kN limit required by the DIN EN 360 standard.

These low maintenance devices have a hard wearing, shockproof aluminium housing and offers extremely low weight for the length of the life-line. The units have a swivelled eye attachment point to prevent the life-line from twisting.

The IKAR HWS Devices have been subjected to additional testing for horizontal use and can therefore be used where the user could potentially fall over a leading edge.

- Easy to use, low-maintenance design
- Load carrying capacity
 - > 1 person, 136kg max
- Various life-line lengths available
- Durable aluminium housing
- Single handed, double action hook to connect to the users harness
- Attachment eye has swivel function to eliminate cable twisting
- Low unit weight
- World renowned German build quality

IKAR GB order codes:

HWS4.5	4.5m galvanised steel cable life-line – weight = 2.7kg
HWS6	6.0m galvanised steel cable life-line – weight = 3.0kg
HWS9	9.0m galvanised steel cable life-line – weight = 3.7kg
HWS12	12.0m galvanised steel cable life-line – weight = 5.4kg
HWS18	18.0m galvanised steel cable life-line – weight = 6.9kg
HWS24	24.0m galvanised steel cable life-line – weight = 8.4kg
