

## Pulley, rescue, 5cm, prusik

P03

### Aluminium, single sheave, Prusik rescue pulley

Anodised aluminium side plates with nylon pulley wheel for reduced weight.

Flat profile plates can be used with a Prusik loop as a progress capture system.

Wide opening swivelling plates for easy attachment to rope.

Room for multiple connectors in large attachment point.

Self lubricating bearing.

Large diameter sheave increases mechanical efficiency.

Rope 13mm diameter or smaller.

### Specifications:

*NB: specifications and colour may change without notice.*

Size:

EN Test Mass: 30kN

Loading: 3kN

Conformity: EN12278

Materials: Alloy sides with nylon pulley wheel mounted on oilite bearing.

Weight (kg): 0.18

Industries:
