

Cyclone locking pulley, alloy

P201

Heavy-duty pulley for hauling with locking cam

Features:

- Lightweight alloy construction
- Simple clean design for ease of rigging
- Low friction integrated pulley wheel
- Unique 'X Cam'[™] locking mechanism
- 100kg Working load

The Cyclone has been specifically designed for technicians to aid hauling of equipment and materials.

The Cyclone is available as part of the WTG lifting kit. The kit includes all the components required to lift small loads.

Stainless steel version available for increased corrosion resistance - P20.

For use with 10.5 mm to 11.0 mm diameter rope.

NB: Not certified for lifting persons.

Specifications:

NB: specifications and colour may change without notice.

Size: For use with 10.5m to 11m rope.

EN Test Mass: n/a

Loading: 100 kg SWL

Conformity: 2006/42/EC

Materials: Alloy body, stainless cam, nylon wheel

Weight (kg): 0.34

Industries: Renewables, construction, telecoms
