

PS2 Pole Strap

The PS2 Pole Strap is for work positioning, it can be connected to each side of a users side work positioning D's, positioned around a pole or similar item. The adjustment device can be used to preset the length, or adjust in use. The PS2 must be used with a full body harness including a waistbelt approved to EN361/EN358 and a back up device.

One-Handed Length Adjuster

Simple one handed operation to either lengthen or shorten pole strap in use, that locks in position when released.

Wear Pad

Polyester wear pad slides along Pole Strap to provide wear protection throughout the range of adjustment.

End fittings

Double action snap hook end fittings as standards, with alternative EN362 compliant end fittings on request.

Polyester Webbing

High strength, high resistance to abrasion, UV, acids, alkalis, oil & water/mildew.
