

Product ID:
RGL11

Product Name:
Kernmantle Rope Lanyard

The RGL9 is a twin leg lanyard, the extra leg allows movement between anchorage points by means of double clipping. This system is generally used for tower climbing, steel erecting, scaffolding and maintenance to open structures.

When used in conjunction with two girder slings (RGK26), the RGL9 can be used as a means of progression through suitable structures where no fixed lifeline or eye-bolts are available. The elastic in the lanyard reduces the amount of hanging slack, which can help to reduce trip hazards and entanglement.

Accredited to:

EN 355:2002

Material:

11mm Kernmantle rope

Max arrest force:

< 6 kN

Fittings:

RGK15 and RGK19

Length(s):

1.7m

Features:

Shock Absorber

Connector

Q05822
