# Dräger Saver CF

The Dräger Saver range of Emergency Escape Breathing Apparatus has been designed using the latest technologies available whilst still bearing in mind our three leading principles; reliability, quality and ease of use.

The Dräger Saver CF constant flow emergency escape breathing apparatus allows safe, effective and uncomplicated escape from hazardous environments with the minimum of user training.

Developed with the user in mind the Dräger Saver CF can be used by anyone in an emergency escape situation, especially designed to be as easy to don as is possible, regardless of face shape or size and is suitable for users with glasses or facial hair.

The Dräger Saver CF is extremely compact in design providing greater freedom of movement and ease of storage.

Designed to be quick and simple to use making escape as uncomplicated as possible.

The easy to don flame retardant hood incorporates a wide visor for enhanced peripheral vision. The natural rubber neck seal is ozone resistant ensuring high levels of protection, and long life, even after storage.

The unit is automatically activated on opening the carrying bag and can be simply re-set in the event of false alarm.

To ensure the unit is working as you need it when you need it, regular checks are recommended. The cylinder contents gauge is clearly visible without any dismantling or adjustments to the unit due to a transparent viewing window located on the side of the bag. This allows for quick and simple cylinder contents inspection.

During an escape situation a warning whistle sounds when the unit is nearing the end of its air supply, this is to help ensure the user knows when they need to be in a safe breathing environment.

# Dräger Saver CF – For Your Safe Escape

Constant flow Hood

Wide Visor

Natural Rubber Neck seal

Photoluminescent panels

Cylinder contents gauge

ST-6137-2007

The unit is contained in an instantly recognisable high visibility orange carrying bag, incorporating photoluminescent panels allowing the unit to be seen at very low ambient light and visibility levels. The carrying bag is interchangeable for either chestbag or bandolier positions, washable, flame retardant and allows water to self-drain.

The Dräger Saver CF utilises a simple fail-safe reducer system with excellent flow characteristics giving a consistent air flow rate at all cylinder pressure levels.

The combined diffuser and exhalation valve account for excellent air supply combined with a very streamlined hood profile..

The Dräger Saver CF provides breathing air for 10 or 15 minutes, according to cylinder size and is fully approved to EN1146, Lloyds Register Certificate of Fire Approval and Lloyds Register Certificate of Type Approval.

The Dräger Saver CF also complies with SOLAS Chapter II-2, The Marine Equipment Directive and The Pressure Equipment Directive.

A full range of accessories are available for use with the including; Storage cabinets for both indoor and outdoor use (with optional wall mounting kit), Safety wash, Waistbelt to prevent excessive movement when set is worn in 'ready' position, Anti-static bag for use in potentially explosive atmospheres, Spare cylinders and Anti-tamper tags.

Low cost of ownership

- No mandatory routine service is required for a period of 10 years.\*
- The cylinder can be charged using standard charging connectors with no special tools or adaptors.

\*Cylinder certification is required according to national regulations.

## TECHNICAL DATA
