SAFETY GEAR STORE

SGS SafetyGearStore

Safety Gear Store Limited stands out in the global market as a reliable provider of comprehensive safety equipment.

Specialising in essential safety categories, including Height Safety, Confined Space, Gas Detection, Rescue, and Rope Access Equipment, as well as Lifting Equipment. Our product range encompasses renowned brands such as Honeywell, 3M, IGD, Globestock Safety, Wolf Lighting, Columbus McKinnon, Reid Lifting and Tractel.

We are committed to supporting our customers in fostering safe working environments. Our expert team is dedicated to helping you identify and source the right solutions tailored to your specific requirements. With access to a wide variety of products from the industry's leading manufacturers, Safety Gear Store ensures that you have the best equipment at your disposal for optimal safety and compliance in the workplace.

Whether you operate in construction, manufacturing, or another specialised field, our focus is on providing quality products and exceptional service to meet all your safety needs effectively. Trust Safety Gear Store to be your partner in safety, enabling you to operate confidently in even the most challenging environments.

HEIGHT SAFETY

SGS SafetyGearStore

Safety Gear Store Limited has established itself as a top global supplier of height safety equipment and solutions.

With an extensive range of products designed for various applications, we prioritise safety and reliability in every item we offer.

Our experienced technical staff is dedicated to assisting you with even the most complex safety applications, ensuring you receive the precise equipment tailored to your needs.

We also provide onsite surveys to help identify and implement the best safety solutions for your specific situation.

Our comprehensive product lineup includes:

- Davits: Versatile structures for securing lines and lifting personnel.
- Tripods: Stable, portable support for retrieval and access in confined spaces.
- Winches: Essential for lifting, lowering, and controlled movement of loads.
- Harnesses: Safety gear designed to securely hold an individual in place during height-related tasks.
- Lanyards: Connective devices that secure the harness to a fixed anchorage point.
- Stretchers: Equipment designed for the safe transport of injured personnel.
- Rope Access: Systems and gear that facilitate safe access in difficult-to-reach areas.
- Tool Safety: Solutions and products to prevent tool-related accidents and ensure safe tool handling.
- MEWP Kits: Equipment specifically designed for safe operations with Mobile Elevating Work Platforms.
- Inertia Reels: Fall arrest devices that provide protection by locking during free fall.

At Safety Gear Store Limited, we are committed to providing top-quality safety equipment to protect lives and enhance workplace safety standards. Our focus on innovation and customer service ensures you have the best solutions available for your height safety needs.

CONFINED SPACE/RESCUE

In today's fast-paced industrial environment, safety remains a top priority, particularly when it comes to working in confined spaces.

These areas, often characterised by limited access and egress, can pose significant hazards to workers.

Safety Gear Store Limited understands these dangers and is committed to providing an extensive range of confined space equipment designed to protect and support workers in these challenging environments.

Extremely quick and professional service from all of the team at Safety Gear Store. Will be using these guys for all future purchases within our group.

GAS DETECTION

Your Premier Partner in Gas Detection Solutions. In an era where the safety of personnel is paramount, Safety Gear Store Limited has emerged as one of the industry-leading experts in gas detection equipment.

Safety Gear Store Ltd is a global supplier of gas detection including fixed gas, portable and semi hi tech products from some of the Industry's leading manufacturers.

With a comprehensive understanding of the potential hazards posed by toxic gases, explosive atmospheres, and oxygen deficiencies, we pride ourselves on offering tailored solutions that meet the diverse needs of various industries across the UK and further afield.

Our Sales team and certified engineers are dedicated to working closely with clients to understand their specific safety needs and regulatory requirements protecting both plant and personnel in the harshest of environments. We offer a long term solution from supply, installation, commissioning, spares & accessories and service plans to suit individual needs ensuring that your safety measures remain operational and effective.

Portable Gas Detection Calibration

Gas detectors are vital for ensuring safety, making it essential to ensure that these devices function accurately. When it comes to portable gas detection, we provide servicing for all major gas detector brands and can help you save both time and money through our custom-built workshop, which is equipped to handle all your equipment testing and calibration needs—from sensor replacements to screen and battery changes. Our technical team brings over 30 years of experience in servicing both portable and fixed gas detection systems.

Fixed Gas Detection

PROJECT SUPPORT

Our team can provide clients with full turnkey project support. This means that we can help write the specification and help design the gas detection system you require. Providing a full specification with marked location drawings and wiring diagrams. As part of the turnkey experience, we have a fleet of installation engineers who can install and commission the gas detection system to meet your deadlines. Finally, as part of a turnkey experience we provide our clients with free system training.

SURVEY & DESIGN

At Safety Gas Store, we offer tailored survey and design services to meet your specific needs, whether you require a single-point gas detection system to monitor one potential risk or a multi sensor solution that addresses various causes and effects across multiple areas and buildings. We're committed to delivering the desired outcomes for every project.

INSTALLATION

Our team of engineers will install your fixed gas detection systems according to your specifications. We will follow the drawings developed from the site survey and our subsequent agreement with you, the client.

COMMISSIONING

Our commissioning engineers will visit the site after installation to perform a comprehensive setup and testing of the system according to the design specifications. They will also conduct a Site Acceptance Test and offer complimentary training on the system to the clients.

SERVICING

Our team of manufacturer-trained service engineers, located across the UK, is readily available for routine maintenance and emergency call-outs when you need them. We recognise that each customer has unique servicing and calibration needs, so we collaborate with you to develop a tailored service contract that ensures you are always supported.

LIFTING EQUIPMENT

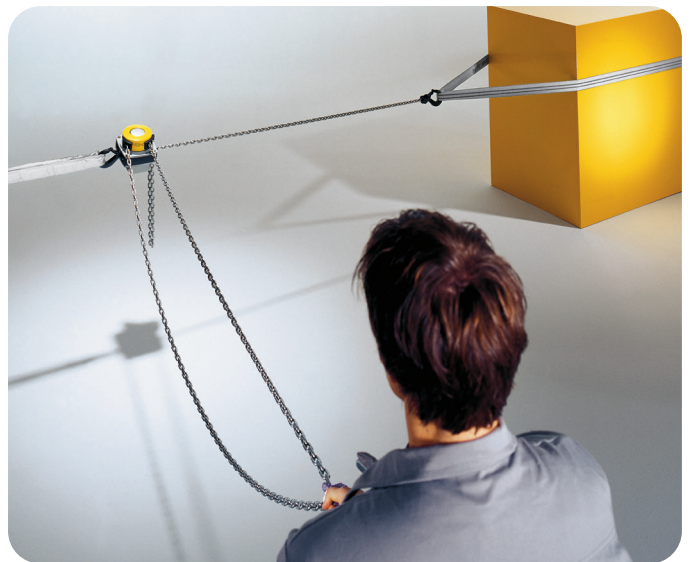

Elevating Your Operations: The Comprehensive Range of Lifting and Handling Equipment.

In today's fast-paced and demanding business environment, the efficiency and safety of material handling operations are more critical than ever.

Whether you're managing a bustling manufacturing floor, conducting a small-scale warehouse operation, or overseeing large construction sites, having the right lifting and handling equipment at your disposal can make all the difference.

At Safety Gear Store, we pride ourselves on offering an extensive range of lifting and handling equipment that caters to various applications, from the most basic needs to complex, customised solutions.

Follow us:   

Safety Gear Store are the sole UK and Ireland distributor for Honeywell Enraf and Honeywell Marine.

Working with Honeywell Enraf we aim to specialise in providing automation solutions primarily for the oil and gas, marine, and chemical industries. Our offerings typically include:

- Tank gauging systems: Solutions for accurate measurement of liquid levels in tanks.
- Fluid management: Systems for monitoring and managing the movement of liquids, including custody transfer applications.
- Automation control: Integrated systems to enhance process control and safety in terminal operations and refineries.
- Measurement solutions: Advanced technologies for the precise measurement of flow, volume, and density of fluids.

Our range of Honeywell marine equipment is used in various applications, including commercial shipping, offshore oil and gas operations, and naval defence. The goal is to enhance operational efficiency, safety, and environmental compliance while addressing the unique challenges of the maritime industry.

Safety Gear Store is the sole Honeywell Marine OEM service centre for the UK and Ireland, joining an elite group of just 18 other OEM centres globally. We are proud to be among the world's leading suppliers of portable level gauging and sampling equipment tailored for marine applications. Our expertise and commitment to quality ensure that we provide the best service and products to meet the unique needs of the marine industry. Whether you require maintenance, support, or equipment for your marine operations, our specialised knowledge and access to OEM resources make us the go-to source for reliable solutions.

If you have specific questions about a particular aspect of Honeywell's marine or Enraf offerings or need information on a specific product or service, feel free to ask!
