

# Rope & Edge Protection

heightec has developed a range of new rope protectors to safeguard rope integrity, protecting them against potential damage and abrasion. Each device is designed and tested to meet specific requirements of the rope access industry.

## NEW Gratemate Grating Rope Protector

For metal or composite grating walkways known as 'Kennedy grating', commonly used in the oil & gas, petrochemical & process industries.

**twin aperture design** - accommodates 2 ropes separately, prevents rope-on-rope friction and fits a wide range of grating sizes

**choice of fittings** - standard or quick connect options available

**quick fit version** - easy to fit and remove, without the need for tools

**range of rope sizes** - accommodates up to 13mm

Registered design

## NEW Sentinel Chainmail Rope Protector

High cut resistance, wrap-around mid rope protector.

**chainmail construction** - durable, corrosion resistant and 'see through' properties allows rope to be inspected without removing from protector

**velcro closure strip** - quick to fit, inspect and remove

**secure fit** - supplied cord loop for rope or structure attachment

**optional PVC cover** - protects painted surfaces
