Rotor

automatic rescue &
evacuation systems

heightec.com

**powerful,
tough,
reliable...**

The Rotor is a completely new, high performance rescue descender designed for the most demanding environments - onshore & offshore wind, oil & gas, power, energy, construction.

innovative rescue technology

The only waterproof rescue descender. Dual mode operation with unique integral usage indicator.

ultimate performance in extreme environments

Versatile, multi-function capability for any rescue situation. Durable, reliable and strong. Optimum efficiency with superior control.

safety and simplicity

Instant deployment. Low profile design with no external moving parts. Minimal conversion training, no change to how you work.

Rotor™

automatic rescue &
evacuation systems

Each rescue system is perfectly tailored to meet the needs of each particular industry.

Fully waterproof mechanism
Maintenance free
10+ year lifespan
High load rating
Unique integral load indicator
Fully sealed system storage
Lowering and lifting capability
Manual or automatic operation
Completely intuitive

Available with brand new heightec offshore FastClip quick release connector (patent pending)
Full range of system options for different applications
Variable rope lengths available
Exceptional specification – genuine 2 person rating
EN341 1A, EN1496 A, CE EN12841 C

Comprehensive, detailed performance data for accurate evacuation planning. Specific, individual client testing available.

Patents pending.
