

VARILUX MICRO

RECHARGEABLE DIVE TORCH

A powerful, rechargeable dive light specially designed for underwater use. The Varilux Micro, for your convenience, is an ultra-compact and lightweight dive torch, with a variable output – it serves as the perfect solution for your lighting needs.

The maximum output of 800 lumens will burn for approximately two hours and on the lowest output of 80 lumens, it will last approximately 28 hours. Like most torches in our Varilux range, light output is controlled via a magnetic induction switch.

Producing much more power than its small and slim profile might suggest, the Micro gives plenty of light for a night dive or looking into dark parts of wrecks. The conveniently compact Micro has a depth rating of 100 metres (328') and is a great choice for a primary light for travelling divers. Its small size means the Micro is also a perfect back up torch to stow away in a drysuit/BCD pocket or on a D-Ring.

What's included with the Micro?

- USB battery charger
- 18650 rechargeable battery
- Lanyard
- Spare O-rings
- Tail cap lubricant
- User instructions
- Hard plastic storage case

Specifications:

Material: Anodised aircraft aluminium
 LED: 1x CREE XM-L2
 LED lifespan: 100000 h
 Brightness: 80 - 800 lm
 Burn time: 2 - 28 hours
 Beam distance: 500m (1640'), angle: 5°
 Peak beam intensity: 20000cd
 Impact resistance: 1m (3'3")
 Depth rating: 100m (328')
 Light colour: white
 Mode: on/off mode (dimming, high and low bright stepless dimming modes)
 Switch design: magnetic induction
 Lens: coated glass lens
 Battery: 18650 3.7 V, 2600 mAh
 Size: 147*35 mm (5.8*1.4")
 Weight (torch): 153g (5.4oz)
 Weight (torch/battery): 197g (6.9oz)
